

GB10-Class AI System Overview

Partner demo sample document

- Compact GB10-class desktop AI system.
- Local inference analyzes images, PDFs, and video.
- Setup: connect display, keyboard, mouse, network, power.
- Keep samples generic for partner-branded systems.

Use this page as a readable document sample for the Hermes Omni demo.

Demo Workflow

1. Inspect a board or system image and describe visible hardware
2. Summarize a short setup note or quick-start document.
3. Review a 1920 x 1080 product-context video.
4. Test external connectivity and policy blocking.

The sample uses partner-ready GB10-class wording.
